

T-roller conveyor systems, TB and TN

With T-roller or automatic conveyor systems, the machine becomes part of the production line, using less labor for consistent cleaning.

The price includes the conveyor with:

1. 1 load platform + a drip tray (stainless steel)
2. 2 load conveyors with a space for one load grating on both sides (frame stainless steel)
3. 2 load gratings (stainless steel)
4. 1 load carriage equipped with rollers (galvanized steel)

TN-system is same, but without side conveyors (2)
